Kindly put, sir.

Unk, I luv ya! I luv your mag! I luv boys! BUT! I know nothing of the things people write to you. I want a pen-pal who'll tell me what "slick" and "hot" and all those other funky words are. I don't know the radiator from the generator but I do know Varmints eat 'em up.

KATHY WILSON (17)

Unk, if those varmint are bugging you, please send them to me; 'cause I'm in Ford country. Of course, those Fords might give Melvin tin-poisoning, but, as they always say, Chevy Rules!

WELDON GRAY (14)

I came across an old weird car, I think you'd call it junk. Battling for the driver's seat, Were six varmint and an Unk. I guess the old guy had had it, when Melvin ate the clutch.

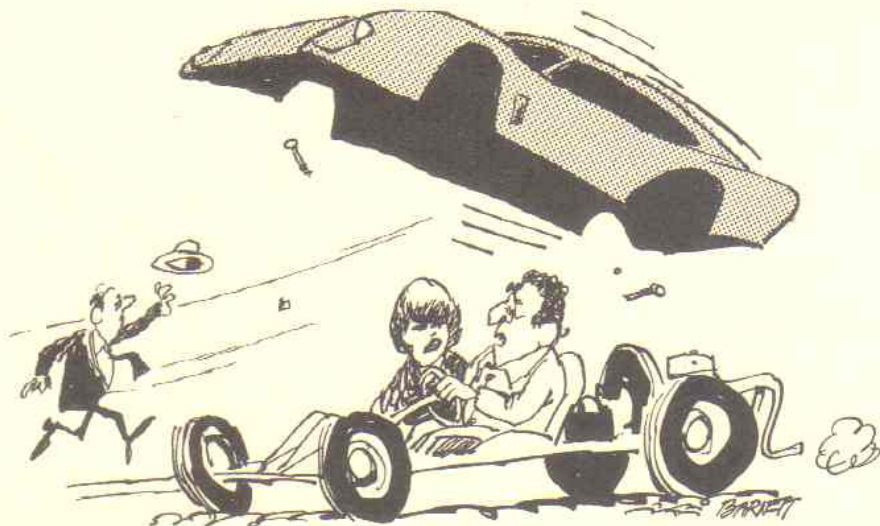

I KNOW I would have, 'cause ONE varmint's way too much!

Everybody is always talkin' about how them Chevys & Fords are tops. Well we got somthin' better. Compared to Chevys & Fords it'll creme 'em, or in other words leave 'em in the dust. Know why? Because it happens to be the greatest of the great ones; Bombardier 'Ski-Do . . . because Chevys & Fords can't go in deep snow. (YUK YUK) Why don't you write some stories about snowmobiles. Well I guess we better SKI-DODDLE out of here.

UNK, Those varmints of yours are driving me CARToonie! Just last night I was putting a model car together and "Melvin" ate the car and the GLUE for dessert! When I was going to bed I sat on one of them varmints and it bit me. Right now I'm hiding in the bathtub. Unk, now hear this: I got all the varmints in a box, (except "Kevin." I need him for my homework).

RICHARD WORDEN (13)

Dear UNK: This is to inform you that you will receive a bill and a suit for driving me insane with your mag and them "VARMINTS!" You better print this letter because it took me one-half hour to type this letter! (SO FAR) Also pardon my typing because I'm still learning. P.S. NONE of you girls, (I think that's what you call 'em?), write me because I've got one and what a DOLL! Insanely yours,

I drive a '55 Riviera Sport Coupe (322 4BBL with Standard and pro power goodies). With gears around 4145 or there-a-bouts, I've managed to push my car to a fairly impressive 15.51 at 90.01, for a Q/S Buick. If there are any "sensible" Buick lovers—owners in the crowd, let's hear from ya—but no 9.2 GT stock Machines, eh? Mopars and Chevies—look out for the new G.S.X. from the light-your-fire boys!! Unk, am looking for another heavy-duty Standard from a 1954 or 1955 Road Master GM Serial No. 1-119—they're harder'n sine teeth to find—any ideas?

I have traveled all over America and Germany. My father is in the Army. He is a Sgt. The last time we were in Germany, my father bought a car, it is called a "N.S.U." and it can top 110.

I may be a girl, but I know a lot about cars. I have gone with boys with cars and that's all they talk about. But when I tell them what I know, they get mad. What is wrong with girls who know how to turn an old car into a good runner? If any boys or girls that can tell me what is wrong with a girl that knows about cars write and tell me.

STELLA HUSTON (16)

Hey Unk, thought I'd scribble ya coupla' facts about our family's wheels (12 of them). We got a '63 & '66 Olds and '62 Chevy. The '63 Olds will shut down anything with four wheels except another Olds or a Jaguar. The '66 Olds we should junk. The '62 Chevy has a V6-235 hemi. It'll wipe any car, 500 caddies included. Unkie-toons print this or I'll sic them varmints and my dog on you.

JIM McNULTY (11)

Watch them threats. I'm sensitive.

Everytime a girl writes in, she asks the guys to write and tell her about cars. I really dig cars but I think that us girls were made to be almost completely ignorant about the workings of a car. But, since I am talking about cars, there is one thing I can say, my Dad SWEARS by Fords. For as long as I can remember, he has owned a Ford, all his cars and now a truck. If any guys out there between 17 and 21 would like to write to a girl who knows very little about cars, be my guest.

My brother's got a friend who has a '60 Chevy, with a 283 and has 450 horsepower, a supercharger, and it has all the super goodies a Chevy would want. It's never been shut down and you can bet your sweet bippy it will out run any Ford in town.

Hey Unk, would you send one of your Varmints out here? (Preferably one who could teach a backwards city about CARS.) Out here they think slips are what girls wear to weddings. They also think an AA fueler is a fancy name for a gasoline truck. And I, being from Southern California, am going out of my tree trying to talk about CARS!

LARRY SUDDUTH

Unk, I ain't no mechanical genius, but I know enough about a car. There's a '69 El Camino out here that'll hit 150 m.p.h. It's only a 307 cu. in. but it's a Chevy so that makes up the difference.

I really feel sorry for all those poor suckers who think they got hot cars. My cousin just got an SS 454 Chev and believe me, it moves. He beat the two fastest cars in town and he don't need to prove nothin' to nobody anymore.

In reading the Mailbag, I came across a Dave Mehl's letter in which he calls the 'Vette the "only true American sports car." I regret to tell him that there is another American sports car. It is the Ford Powerd Cobra, built by Carroll Shelby (now he's building the Shelby Mustang). This Cobra wiped 'Vettes and even Ferraris off the track.

TOM PARRISH

Unk, I've had it! You hear all this about my Chevy, Ford and so forth can shut down any Mopar. Well, if this is true, how come on the track, Dodges top driver, Bobby Isaac who drives a Daytona Charger, is leading in the Grand National point standings in N.A.S.C.A.R. at this time 5-15-70? If I am not wrong, the standing of wins for the '70 season is now MOPAR-7 Ford-4. If any cars rule it's the one and only MOPAR. "Superbird" is a hot one too.

Dear Dummies; As I read along thru the letters I realized that none of you had written about the tremendous car, the OLDSMOBILE. My dad owns an Olds and I think they are the greatest. Ours is the greatest car in New York and anywhere else in the WORLD. It's got an Olds 440 cubic inch, 395 horsepower supercharged, fuel injected, 4-barrel, 4 speed and it will mop up any car on the road. She'll do the 1/4 mile in 6.6, no sweat. 190 M.P.H. is tops for her.

Well I might as well spit it out straight! I love to read your mag. You deserve a few words of praise. You should honor Nelson Dewey for his contribution to "CARTOONS." I think he is first with Jerry Barnett at a close second. Say hello to Jim Willoughby for me. I really groove on Dodges, Plymouths and Chryslers. My brother is a loyal Ford lover. He digs the Mustang the most (he made me say that). I dig the 383, 426, 440 and the new CHALLENGER the most. Some correspondence with other loyal mopar lovers would be appreciated.

I got a '69 AMX with a fuel injected Chevy Rat mill. It runs the 1/4 mile in 6.28 seconds. My secret is in the fuel. I use STP, GUNK, Wesson oil, mashed potatoes, 2 eggs, 1 cup of milk, 1 shredded CARTOON mag (which scares it down the strip).

"Sam, maybe this wasn't such a good deal after all . . ."

My brother has a low-down 1968 GTX that can tear down any road runner or charger in his class. He has a super speed cam and dual exhausts and chrome wheels. He ran down a Chevy SS 396, a 383 road runner and a 440 charger. He also sticks a 4-speed stick. Anyone wants to see this bad machine or can you handle it.

I get your mag every time I go to the dump. I got this thing about Ford's, drag racing and gurls. Unkie, how did a goofy dude like you get into a dud mag like this? If you don't print this I'll tell everybody that UNK CAN'T DRIVE.

I'm photogenic, (whatever THAT means.) Did you HAVE to tell th' readers 'bout my drivin' talents?

I'm just crazy about cars. But I've got a hangup—I don't know a thing about them. But I still luv 'em. So if any of you guys out there would care to write a girl with light sandy blonde hair and blue eyes, please feel free to do so. I promise I'll answer each letter. I especially dig soldiers, or any boys, 17 on up.

I got in a lot of trouble reading your mags. I was walking home from a ball game and past a drug store. I saw your mags and bought one. I was on my way reading your mag, and rolled over with laughter. A fuzz saw me and thought I was crazy. They were gonna let me go but when they saw what I was reading, they KNEW I was crazy. They gave me a groovy coat with no sleeves. Now I'm reading your mag in a room with padded walls.

This letter is to Ford, Chevy, Buick, Oldsmobile, Mercury, and Cadillac fans. I have a '70 hemi Cuda that will beat any car in this magazine. My Cuda has a four-speed "Pistol Grip" Hurst shifter. A couple weeks after I got it I installed a full grind roller Crane cam, hooker headers, Holley 7.43, dual carbs on an Edlebrock manifold and Shaffer flywheel and 3 plate pressure plate and clutch. I have Crager mags on all four with M & H Slicks for the drag-strip. It does the ¼ in 11.12 seconds. Top speed of my 'Cuda is 173.45 m.p.h. (According to the local police.) The rear end gear is 4:10 with a special designed driveshaft. I'll take on any car that writes to me telling what junk he has. Remember, Chrysler rules.

I'm a 17 yr. old girl who has a fantastic knack for RUINING a nice car. Transmission and springs in particular. I have a '62 Rambler at the moment. I'll write to any lonely servicemen, in particular, or anyone who would like a little extra mail.

I was up in my treehouse working on my Cobra (it bit me three times) when Melvin chewed out the supports holding up the treehouse. I was in the hospital for five weeks with a double concussion of big toe. It made me so mad I almost gave up drinking fingernail polish.

JOHN NELSON

I think your mag is great because you let us tell it like it is, "So here goes." I think it's funny that everyone that writes in has the fastest car in the world, but I have yet to see their names at a big drag race. Also they cut other cars because they say they are no good. Well I say the car is as good as you make it so you just can't tell, because no matter how fast your car is there is always one faster somewhere.

Hoo Went Wong, hustling freight hauler, was top coolie of the Orient—until competition moved in with U-HAULIE rickshaws. But cool Hoo could do no wrong. He HAD to be # Wan. He installed a full-blown air-coolie engine and out-hauled U-Haulie.

Humble Hoo's fire suit made of fire-proof fire fly pelts.
Suit's inside lining made from rejected gag-line fortune
cookie reading slips.
